

DNS Traffic Baseline

Show overall DNS traffic trends to detect spikes or outages

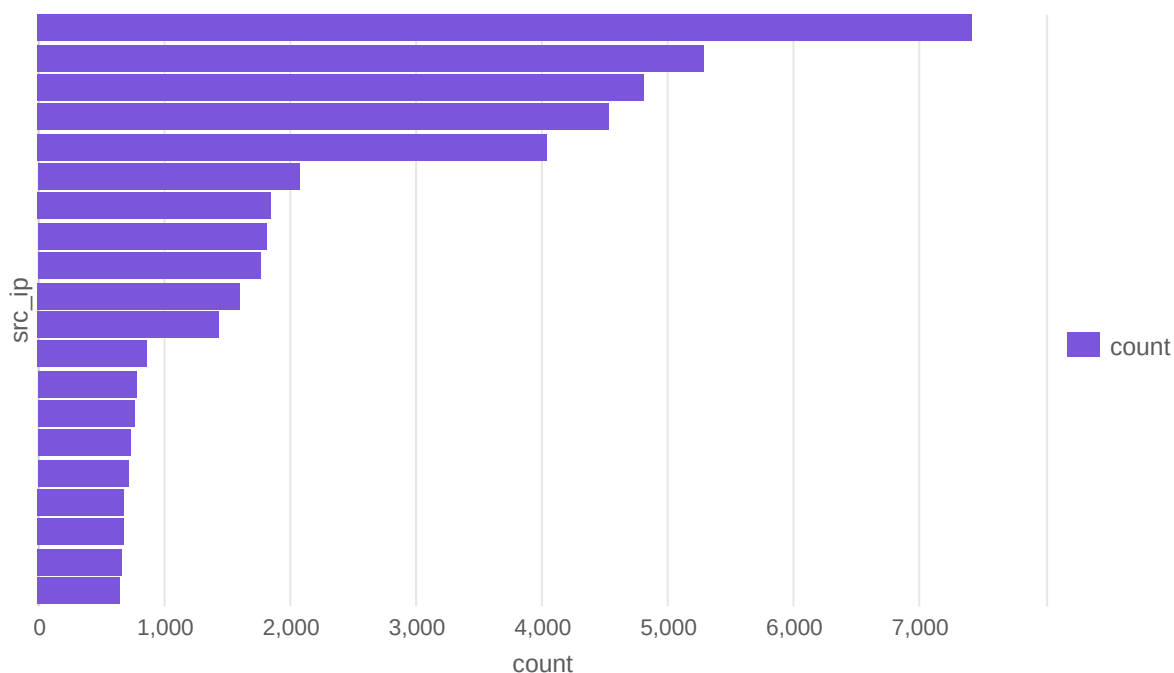

Top 20 Queried Domain

Identify domains queried most frequently, potential C2 or suspicious domains

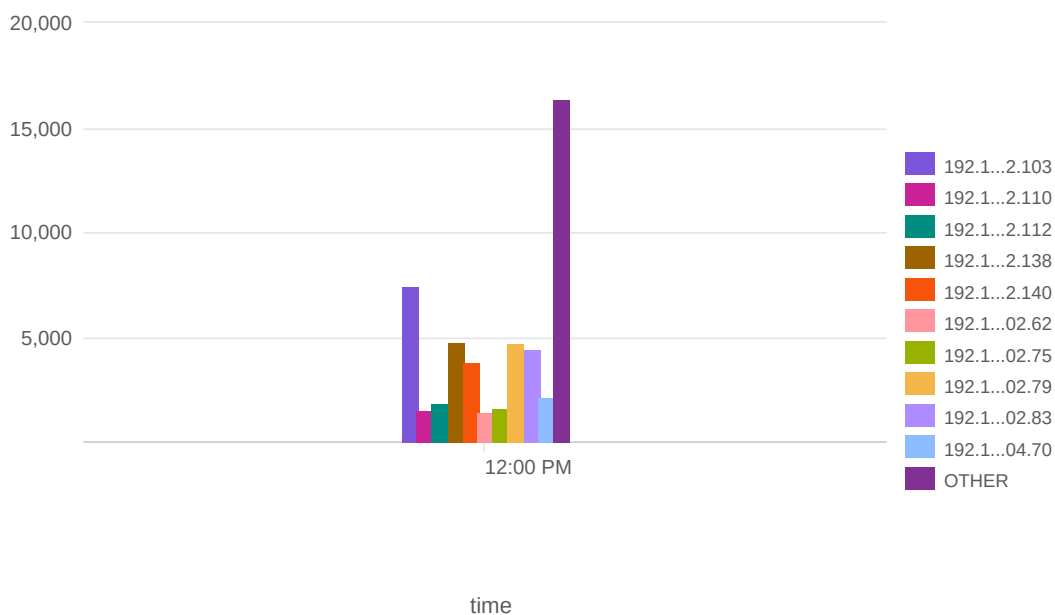

Top Clients (Top src_ip)

Highlight clients generating the most traffic for investigation

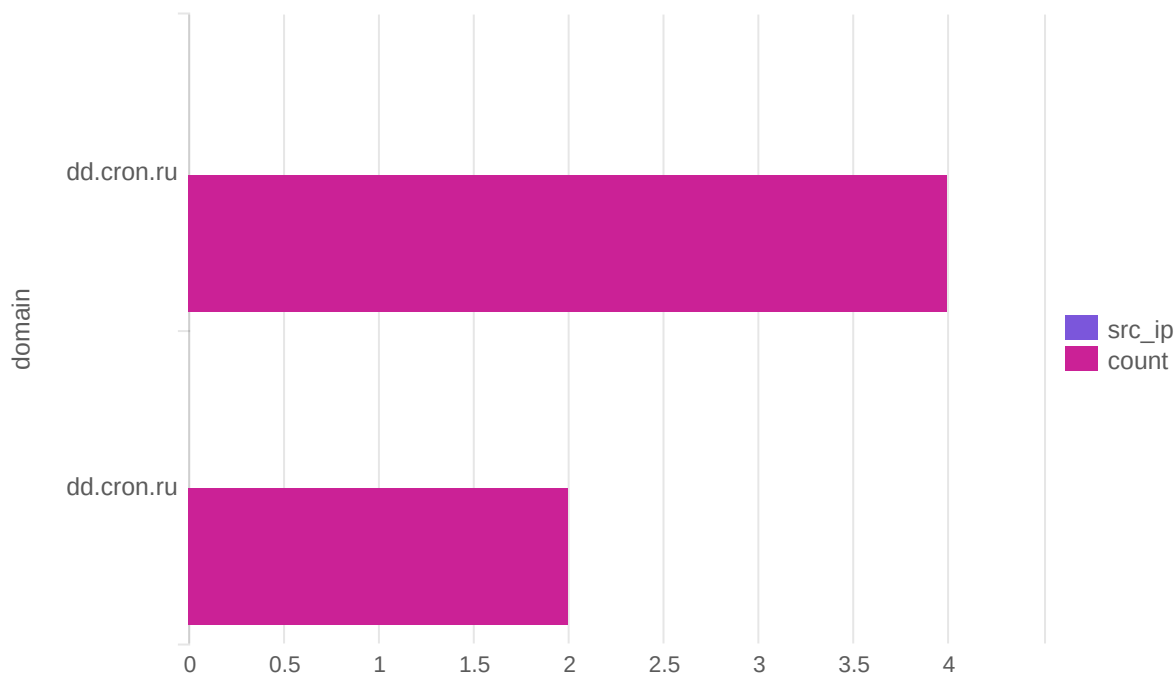

NXDOMAIN Trend

Spot misconfigured hosts or potential DNS tunneling attempts

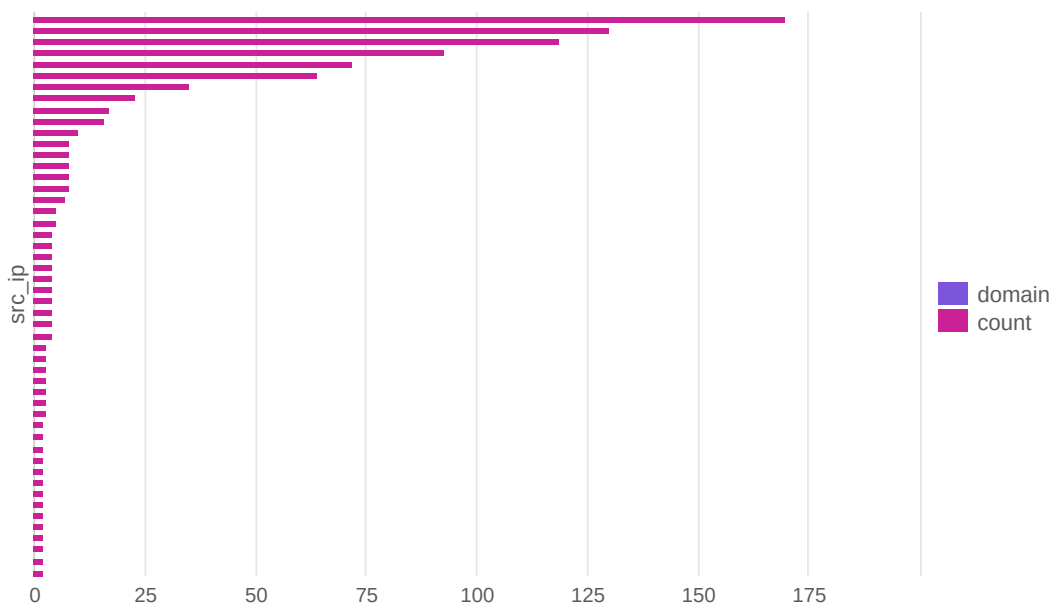

Suspicious TLD Queries

Detect potentially malicious or high-risk domains

Large DNS Query Length (Tunneling Detection)

Identify DNS tunneling attempts using long domains

Repeated Domain Flood (Brute-Force Beaconing)

Detect brute-force or beaconing activity from domains
